Updating the Driver
Windows 2000
To update the driver software, you must replace the older version residing on your PC with the most recent version.
The procedure for updating the Driver is described below.

Double-click the "My Computer" icon on the desktop (PC screen).
Note: While the actual items displayed on the Desktop will vary from computer to computer, the "My Computer" icon in most cases will be found in the upper left of your screen.

Double-clicking "My Computer" displays the following window.
Double-click Control Panel in the window.

Plug the connector of the USB Microscope into the PC USB port.
Double-click System to display the following screen.

Click the [Hardware] tab (circled in the illustration).
Click the "Device Manager..." button (circled in the illustration).

Double-click [Imaging Devices] (part (1)).
The name of the driver (Scalar USB Shot) is displayed.
Double-click Scalar USB Shot (part (2)). The following screen is displayed.
Click the [Driver] Tab. The following screen is displayed.

Click [Update Driver...] button.
Click "Next>".

Upgrade Device Driver Wizard

Install Hardware Device Drivers

This wizard upgrades drivers for the following hardware device:

Scalar USB Shot

Upgrading to a newer version of a device driver may add functionality to or improve the performance of this device.

What do you want the wizard to do?

- [ ] Search for a suitable driver for my device (recommended)
- [x] Display a list of the known drivers for this device so that I can choose a specific driver

Click "Display a list of the known drivers...".
Click "Next>".
Click the [Have Disk...] button.

When the screen shown above is displayed, click the [Browse...] button.

Next, specify the location of the driver. For the sake of example, we'll assume that the driver is located on the CD-ROM.

Click the "Look in" Pop-up Menu and select the "USB_SHOT" Icon on Pop-up Menu.

Continuing with the example, we'll select CD-ROM drive (D:) here. The following screen is displayed.
Double click "Driver".

Click "pcam2" and "Open" button.

When the screen shown above is displayed, click the [OK] button.
Click the [Next] button.

Upgrade Device Driver Wizard

Select a Device Driver
Which driver do you want to install for this device?

Select the manufacturer and model of your hardware device and then click Next. If you have a disk that contains the driver you want to install, click Have Disk.

Models:
Scalar USB Shot

Click the [Next] button.

Upgrade Device Driver Wizard

Start Device Driver Installation
The device driver will be installed with the default settings.

The wizard is ready to install the driver for the following hardware device:
Scalar USB Shot

Windows will use default settings to install the software for this hardware device. To install the software for your new hardware, click Next.

Click the [Next] button.
When the screen shown above is displayed, click the [Yes] button.

When the screen shown above is displayed, click the [Yes] button.

Driver installation starts. The screen shown above is displayed after a brief interval. Click the [Finish] button in this screen.

This completes the driver update.
